MINIATURE / MOLDED CIRCUIT BREAKERS

FUNCTIONS:

- Short-circuit protection
- Isolation function
- Overload Protection
- Indication function of contact position
- Support 35mm Din-rail installation
- Support top incoming and bottom outgoing wiring type, or bottom incoming and top outgoing wiring type.
- Able to select electrical accessories and achieve distant indication of MCB condition: breaking, closed, and fault tripping.
- Able to select electrical accessories and realize under-voltage and over-voltage protection of MCB and distant shunt release.

NEW WALL SWITCH & SOCKET

Handsome & Victorious

Features

- The claws are surrounded by invaginated structures, that make installation convenient & rapid without hurting hands
- The strong & steady structure; because the base is multipoint, riveted with steel frame
- Anti-back screws prevent the screw from dropping & missing when screwing
- The high strength PA material (960° C) makes sure the better fireproof performance of the base
- We adopt «Arch Bridges Idea» for our base design, which increases the surface area of wiring; meanwhile making the base stable without deformation

Switch Highlights

- The original strong non-breaking technology ensures the reliability & safe touch of ON/OFF switch
- LED Neon is good for power saving & environmental protection
- The grade II shock absorption lowers the sound on switching

Socket Highlights

100% PHOSPHOR COPPER

Cuprous parts of socket are made up of Phosphor Bronze (94% Cu & 6% Sn). It means it possesses High Strength with High Elasticity besides good Wear-Resistance. Moreover it is made by one-time forming without riveting.

10,000 TIMES

The original «V» design of automatic repairing ensures the good performance of copper parts even after 10,000 times of usage.

15,000 TIMES

The Earth pole is designed in a scientific «C» structure, which keeps the high strength and elasticity after repeated swapping.
